Descriptive, provisional coding
Purposeful selection
Not exhaustive
Effective outcomes count each record once.
Deferral and technical failure are not exclusion.
B Purposeful full-report synthesis
384 selected report rows / 381 systems
373 systems linked to candidate pool
8 from additional discovery routes
Report access (384 rows)
135 full reports; 1 abstract only; 248 unavailable
Three related-report rows add no new system.
System assessment (381 systems)
132 completed; 249 without completed assessment
