Assistance × Visualization Modality

Report-supported systems after the October access follow-up

79/381 systems have ≥1 supported placement · 135 completed system assessments · 122 non-additive system–cell placements

	Desktop/Planar	Large Display	VR	AR/MR	CAVE
Algorithmic	**n=52** VIPER · NCFS CellWhisperer · CFS +50 systems	**n=5** Cosmic View · NCS Echo · CFSR +3 systems	**n=14** VROOM · NCFS RATS VR · NCFS +12 systems	**n=16** AR Microscope · CFS Vitessce Link · NCFSR +14 systems	**n=3** iCAVE · NCFSR ExaViz · NCF +1 system

Task symbols: N navigation · C comparison · F selection/filtering · S sensemaking · R collaboration

Each eligible system is counted once per supported cell; systems can occupy several cells and counts are not additive.

Dashed cells retain unresolved coverage; empty cells denote no representation in the assessed set. See Section 2.6 for the dated access outcomes.

NAVRNA: tangible specification of constrained deformation. Cosmic View: planetarium dome, distinct from a tracked CAVE configuration.
