

Assistance × Visualization Modality

Distinct full-report-supported systems after the complete three-cell targeted pass

76/381 systems have ≥1 supported placement · 132 completed system assessments · 118 non-additive system–cell placements

	Desktop/Planar	Large Display	VR	AR/MR	CAVE
Algorithmic	n=51 Robin · CFS CellWhisperer · CFS +49 systems	n=4 Echo · CFSR MinOmics · NCFS +2 systems	n=14 VROOM · NCFS RATS VR · NCFS +12 systems	n=16 AR Microscope · CFS Vitessce Link · NCFSR +14 systems	n=3 iCAVE · NCFSR ExaViz · NCF +1 system
Adaptive	n=4 Facetto · NCFS Metis · NCFS +2 systems	— Representative not yet established	n=3 SAMIRA · NCFS AI annotation · NCFS +1 system	n=1 Liver MR · NCFS	n=1 ExaViz · NCF
Conversational	n=10 CellWhisperer · CFS Robin · CFS +8 systems	— not represented in assessed systems	n=2 SAMIRA · NCFS ASCRIBE-XR · NFSR	— not represented in assessed systems	— not represented in assessed systems
Immersive	— Representative not yet established	— Representative not yet established	n=6 Space-Time HC · NCFS AI annotation · NCFS +4 systems	n=2 Liver MR · NCFS Skin-lesion AR · CFS	n=1 ExaViz · NCF

Complete targeted-pass result (dashed cell borders)

Immersive × Desktop/Planar: 110 deduplicated groups; 24 full reports assessed; 23 unsupported, 1 scientifically unresolved, 86 unavailable.

Immersive × Large Display: 20 groups; 5 full reports assessed; 4 unsupported, 1 scientifically unresolved, 15 unavailable.

Adaptive × Large Display: 12 groups; 1 full report assessed and unsupported; 11 unavailable.

Boundary evidence not counted: StarmapVis has a trajectory-driven non-VR camera tour but unresolved system eligibility; MinOmics does not demonstrate guided navigation in the wall workflow.

CAVE and VR reports were not relabeled as Large Display or Desktop. Access failure remains separate from scientific rejection.

Automated assessments remain pending author approval. Machine-coded candidate-record counts are reported separately.

Task symbols: N navigation/multiscale · C comparison/differentiation · F selection/filtering/precision · S sensemaking/hypothesis · R coordination/collaboration

Eligible systems are counted once per cell; related reports are linked; cells are multilabel and totals are not additive.

Empty cells mean “not represented in assessed systems,” not “no systems or literature exist.”
