

Assistance × Visualization Modality

Distinct full-report-supported systems in the bounded assessed set
50/88 systems have ≥1 supported placement · 79 system–cell placements · cells are multilabel and non-additive

	Desktop/Planar	Large Display	VR	AR/MR	CAVE

Contextual / unresolved evidence (not counted)

- ◇ UltrARsound — AR tracking/display only; no eligible analytical workflow
- ◇ Generic anatomical-model builder — CAVE portability claimed; no demonstrated CAVE workflow
- ◇ StarmapVis — E4 substantive-computation hold (desktop/VR)
- ◇ Rapid QC-MS — fixed-threshold alerts; Adaptive placement unresolved

Task symbols: N navigation/multiscale · C comparison/differentiation · F selection/filtering/precision · S sensemaking/hypothesis · R coordination/collaboration

Counts include only eligible systems with report-level evidence for the actual assistance–modality combination, counted once per system per cell.
Empty cells mean “not represented in assessed systems,” not that no systems or literature exist. Candidate discovery counts are reported separately.
